

# Sorting activities for Gardening

Sorting is a very important skill for children and lots of time is spent developing this skill in school. Here are two simple sorting ideas to try at home which relate to the theme of gardening!

1. You could arrange a sorting activity for your child on items that grow and don't grow in the garden

Things that grow	Things that don't grow
  	 

2. Alternatively you could make a simple sorting activity with a few various items in the garden e.g. using stones, leaves, flowers and sticks, ask your child to sort the items into various baskets or buckets with the correct item in each.

Flowers	Grass
	
Leaves	Sticks
