

Upcoming Assistive Technology Webinars for students who are Blind or Visually Impaired

Many of our blind and/or visually impaired students use technology to enable them to access the school curriculum. In order to help parents, students and teachers gain a better understanding of the technologies that are available, a number of webinars have been organised by assistive technology suppliers Humanware and Sight & Sound Technologies. Technologies such as low vision and braille devices will be demonstrated. These webinars will assist students, parents and teachers in understanding devices and equipment that are accessible to our students. Details on how to access webinars are listed below. Some webinars have already happened and can be accessed at the link shown while others will happen live.

Visit the links for information on both upcoming and past webinars.

| This week, our HumanWare Low Vision Live Webinar will not take place as we will be presenting during ATIA's session. Don't miss out this session! | | | |
| ATIA's session: Using a Connected CCTV with Your Students at Home | Wednes day, May 20 th at 5pm | In this session, you will learn how to use a connected CCTV to help your student from a remote location. You will learn how to use different APPS as well as the front camera of the CCTV to stay in contact with the student. The student will be able to work on his or her documents and share it with his or her tutor in real-time. | You can register for this session at https://www.atia.org/path-lms/?pathPage=%2Fatia%2Fcourses%2F18161 |
