Goals for Today

- Understand the **Origins of UDL**
- Examine the Science of **Learner Variability**
- Design to Enhance **Equity & Efficiency**
- Consider the **Power of Policy**

Take care of you.

A little about me ...

2015

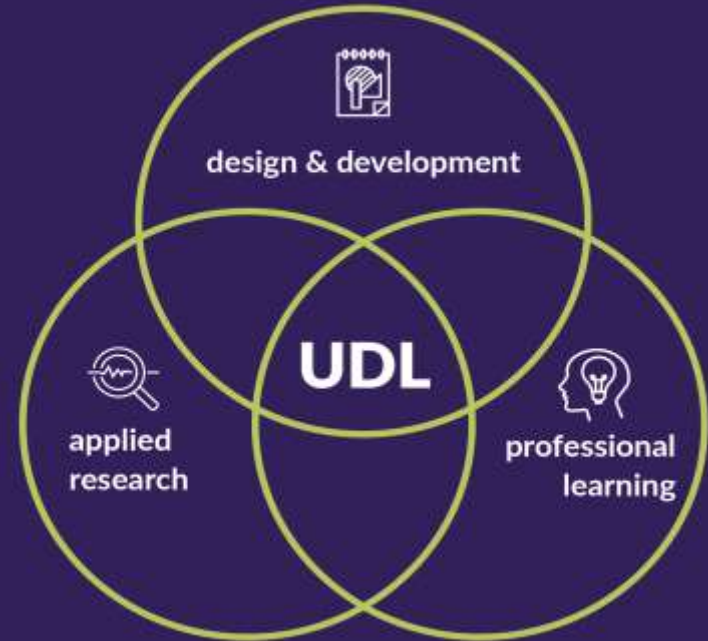

2023

A little bit about CAST ...

CAST leads, inspires and convenes a global community to design equitable, inclusive learning experiences using our Universal Design for Learning framework.

Tell me a bit about you ... are you a

Parent/Caregiver

Teacher/Specialists

School Leaders

Policy Maker

(1) Origins of UDL

CAST – 1984

David Rose

Anne Meyer

Theory: The Barrier is in the Environment

Learners aren't broken, learning environments aren't well designed.

The Barrier is in the Environment

“When a flower doesn’t bloom,
you fix the environment in which it grows,
not the flower.”
-Alexander Den Heijer

1984

First year the personal computer was available

It worked!

Started working in a clinic with 9 students they called the Pioneers.

UDL: Informed by 3 Fields

Architecture

Brain Science

Technology

UDL: A Model based on 3 Brain Networks

Affective

Recognition

Strategic

The Learning Networks

Affective Networks
The “Why” of Learning

**Provide multiple means
of Engagement**

Affective networks monitor the internal and external environment to set priorities, motivate, and engage learning and behavior.

How students will engage?

Recognition Networks
The “What” of Learning

**Provide multiple means
of Representation**

Recognition networks sense and perceive information in the environment and transform it into usable knowledge.

**How students will
perceive?**

Strategic Networks
The “How” of Learning

**Provide multiple means
of Action & Expression**

Strategic networks plan, organize, and initiate purposeful actions in the environment.

**How students will act on
their understanding?**

Universal Design for Learning (UDL) is an approach to improve and optimize teaching and learning for *all* by setting clear, **rigorous goals; anticipating barriers; and proactively designing** to minimize those barriers.

The UDL Foundational Concepts:

The barrier is in the environment, not the learner.

Variability is the norm.
It is contextual.
It can be planned for.

The goal of UDL is expert learning

(2) Science of Learner Variability

The UDL Foundational Concepts:

Variability is the norm

Variability is the norm.

“Variability is the dominant feature of the nervous system. Like fingerprints, no two brains are alike”.

There is no such thing as an average brain.

UDL and the Learning Brain, CAST 2018

The Old View of the Brain

The New View of the Brain

“ ‘Variability’ is the term used to describe just how unique and varied our brains are. No two learners activate the same pathways in the brain.”

Posey & Novak, 2020

Rubik's Cube

There are an infinite number of ways to solve a Rubik's cube.

Dimensions of Learner Variability

- Interest
- Perception
- Language
- Physical Navigation
- Executive Function Skills

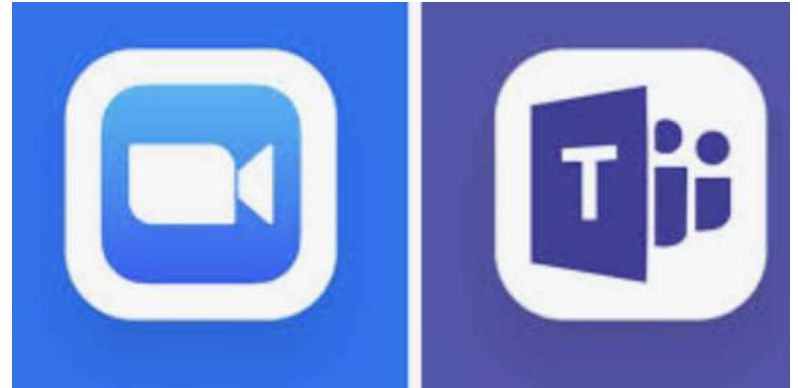

Context Matters

In some ways ...

Disability is contextual.

Identity and social context
shape our reactions to the
challenges we face.

The UDL Foundational Concepts:

We can design for variability

Variability is predictable in learning and can be designed for.

(3) Design to Enhance Equity & Efficiency

**Every system is perfectly
designed to get the results it
gets.**

W. Edwards Deming

Equity

Equality, Equity, and UDL

Equality

Equity

UDL Design Process Steps

Set Clear,
Rigorous Goals

Anticipate
Barriers

Design Options

Areas to Consider when Anticipating Barriers

Materials

How is the content being **represented**?

Methods

How is the content being **delivered**?

Assessment

How is the learning being **demonstrated**?

Environment

How is the **climate/culture** supportive of the learning?

Areas to Consider when Anticipating Barriers

Protocols
Routines
Expectations
Physical Space

The Language of UDL

Restate the barrier as being in the design not the learner.

From: This student did poorly because she couldn't read well enough to learn the content.

To: The student did poorly because the lesson required her to read in order to learn the content.

From: Ella can't pass math because she can't sit still.

To: Ella can't pass math because the lessons require her to sit still.

Efficiency

Excited to throw a dinner party!

What's your goal?

- To see your friends!

Variability in your Guests

Planning in Advance

Proactive Buffet!

Here the food doesn't get in the way of the fun.

Your goal matters

Architecture Now: Universal Design (UD)

Reflect and Share:

- Who will use the ramp?
- Why are the handrails important?
- Who else may benefit from this design?

You should never be ashamed to admit you have been wrong. It only proves you are wiser today than yesterday.

Jonathan Swift

Case Study - Teachers

Research question

In what ways, if at all, is learning about UDL and applying it to practice serving to **promote teachers' sense of agency?**

Design of the New Hampshire Network

- 762 participants
- 66 Schools
- Job-embedded professional learning:
 - Instructional rounds, lesson design studios, classroom video analysis, and looking at student work
- Online learning modules
- Implementation and Coaching Academy
- Conferences

Findings

UDL offers teachers a sense of “permission” to teach in new ways

Teachers leverage UDL to:

1. **Validate** learner-centered approaches that may not align with colleagues’ more traditional approaches
2. **Gain confidence** in their pedagogical commitments
3. **Hand over control to students**

Teach students how to learn,
not just what to learn.

Artificial Intelligence: David Touretzky

Q: Why should we teach kids about AI?

A: It's important that kids understand AI because they're growing up with it already. It's not in their future, it's their current life. By the time they go to school they've spent two years talking to Alexa.

9/18/23 – [Kindergarteners Already Use AI](#), Carnegie Mellon News, Caroline Sheedy

(4) Power of Policy

UDL in US Policy Over Time

Federal Law

1965 – Every Student Succeeds Act (ESSA)

1975 – Individuals with Disabilities in Education Act

33 YEARS LATER

2008 – Higher Education Act – **UDL included**

TODAY – UDL is also in our General Education Law (ESSA), and our Career and Technical Education Law (Perkins).

UDL in Ireland's national curriculum

“Subject specifications and short courses developed by NCCA **will be designed to be as universal as is feasible**, providing meaningful and valuable learning opportunities for students from all cultural and social backgrounds and from a wide variety of individual circumstances”

(DES, 2015, p.26)

Inclusive education and diversity.

Inclusive education provides for equity of opportunity and participation in children's learning. **Inclusive education celebrates diversity and responds to the uniqueness of every child.**

(DES, 2023, p.6)

UDL Globally

UN Sustainable Development Goal

Learners with disabilities represent a significant percentage of the 387 million primary-age children around the world who are unable to read, write, or do math. **The human and dollar cost of this exclusion is significant.** Countries lose billions of dollars of potential income when people with disabilities are not educated or working.

--Toolkit for International Education Stakeholders, UDL to help all children read

Reflect

What resonates with you?

What questions do you have?

What surprised you?

What's an action you can take?
